

We have the pleasure to invite you to the first LabEx CORTEX event. On Wednesday November 14<sup>th</sup>, a series of CORTEX weekly conferences will take place to present each CORTEX teams and promote on-going projects. Each week at ISC amphitheatre, there will be two 45 minutes conferences punctuated by refreshments.

You will find below the program:

<b>Wednesday 14 November</b> From 5.30	<b>Henry Kennedy</b> <i>What do we know about inter areal connectivity of cerebral cortex ?</i>
	<b>Jean-Claude Dreher</b> <i>Neural coding of computational factors affecting decision making.</i>
<b>Wednesday 21 November</b> From 5.30	<b>Jean-Philippe Lachaux</b> <i>1998 – 2013: the new wave of human intra-cranial electrophysiology.</i>
	<b>Nadine Ravel</b> <i>Detecting learning-induced modulation of oscillatory activities in a neural network: a new functional imaging?</i>
<b>Wednesday 28 November</b> From 5.30	<b>Luis Garcia-Larrea</b> <i>Pain in the brain: from nociception to compassion.</i>
<b>Thursday 6 December</b> From 5.30	<b>Pierre Savatier</b> <i>Genome modification in non human primates: toward the generation of monkey models of human diseases.</i>
	<b>Denis Pélisson</b> <i>Brain quality control of motor acts: adaptation of the saccadic eye movement system.</i>
<b>Thursday 13 December</b> From 5.30	<b>Léon Tremblay</b> <i>The relationships between Basal Ganglia and the Frontal cortex: New issues to understand the neuronal bases of behavioral disorders.</i>
	<b>Colette Dehay</b> <i>Development and evolution of the primate cerebral cortex.</i>
<b>Thursday 20 December</b> From 5.30	<b>Valérie Castellani</b> <i>Exploring the links between topography and polarity in the developing nervous system.</i>
<b>Thursday 10 January</b> From 5.30	<b>Marie-Claire Villeval</b> <i>Behavioral economics: the end of the economic man?</i>
	<b>Emmanuel Procyk</b> <i>Functions and maps of the cingulate cortex.</i>
<b>Thursday 17 January</b> From 5.30	<b>Jean-René Duhamel</b> <i>Neural mechanisms for social information processing in the non-human primate.</i>
	<b>Olivier Koenig</b> <i>From emotion to attention, learning and memory.</i>
<b>Thursday 24 January</b> From 5.30	<b>Angela Sirigu</b> <i>How oxytocin affects brain functions.</i>

#### Useful information:

Place: Amphithéâtre ISC  
67, boulevard Pinel  
69675 Bron Cedex  
<http://fr.mappy.com/#d=67+bd+pinel+69675&p=map>

Access: Bus lines C8, C9
